

## Clean water solutions for your entire home

We have an entire suite of WaterCare products for **every** room of your home.

### The kitchen. The bath. The bar.

Anywhere, in fact, where crisp, delicious, healthful drinking water is essential.

- Designer Faucets
- Commercial Grade Under-Sink Drinking Water Systems
- Commercial Grade Under-Sink Instant Hot Water Dispensers
- Commercial Grade Under-Sink Water Chillers
- Commercial Grade Under-Sink Reverse Osmosis Systems

Everpure Drinking Water Systems provide a minimum of one year of sparkling, clean drinking water. Near the end of the filter's life, the flow rate begins to slow down, letting you know it's time to change the filter.

But, throughout the life of the filter, the quality never changes. The filter is as good as the first day it was installed.

So our three key features are:

- Unlimited bottled water at your finger tips
- Good to the last drop
- Environmentally friendly alternative to bottled water
