

Danamark Appointed Master Distributor for Antunes Ultrafiltration Water Technology

Danamark WaterCare is pleased to announce a new distribution agreement with A.J. Antunes to market and sell Antunes Filtration Technology (AFT) products in Canada.

AFT, a division of A.J. Antunes & Co., is an industry leader in supplying innovative water filtration systems for a multitude of uses – from residential, foodservice, commercial, industrial and light municipal. Partnering with companies from around the globe, AFT creates *durable, dependable and easy-to-use* custom systems that remove more microbiological contaminants (particulates, cysts and bacteria) than any other system.

They also substantially reduce the amount of viruses that may be present in water. The exclusive AFT patented multi-bore capillary membrane technology serves as the core to providing the ultimate in efficient and effective water filtration solutions.

“We’re extremely pleased to be adding this wonderful new technology to our solutions offering,” said Robin Howlings, President of Danamark WaterCare. “Danamark has been providing premier water filtration products for more than 30 years and our expansion with *Ultrafiltration* technology is a key step in our commitment to provide environmentally responsible solutions to our valued clients.”

Scott March, Director of New Business Development, adds “Danamark WaterCare and A.J. Antunes & Co. (Antunes Filtration Technologies) have remarkable corporate synergies. Regarding business philosophies, you can’t tell where one company ends and the other begins. We both pride ourselves on providing the best solutions to our customers and we are not simply focused on how many disposable filters we can sell...we feel we stand alone in this category. We are extremely excited about our future working with Danamark as our partner in Canada.”

We have many different ideas and many different people throughout our organization. Yet we are one company, one team, with one care...Water. Founded in 1975, Danamark is a 100% privately owned Canadian company specializing in innovative and cost effective WaterCare solutions.
